

THIS LAND IS THEIR LAND.

This land has put food on our table. This land has provided us with opportunities to make a living. This land is part of who we are. And we don't want that to change. Not for us. And especially not for our kids.

Call your state and local representatives. Remind them that we receive federal funds to repair the environment. And that's the way our money should be used. To restore our land. And to preserve our way of life.

Call your parish president at 123-456-7890. Make sure that federal funds from the RESTORE the Gulf Coast Act go to restoring oyster reefs in Louisiana. Doing so will enhance our fisheries, protect our coastlines, and create jobs. In other words, preserve our way of life.
